Proposers must respond to all segments Module 1-A and 1-B with a proposal in order to be considered responsive. Proposals will be disqualified if any segment is not incorporated into the proposal. Similarly, two (2) or more firms may submit proposals as a prime contractor(s) and subcontractor(s) relationship. In the event of such an arrangement, the Board reserves the right to reject any subcontractor and accept only the primary contractor. The Board will not accept a subcontractor and reject the primary contractor. If a subcontractor wishes to be considered separately for a portion of the services, such firm should submit a separate proposal as a primary contractor.

Proposal(s) must be submitted both hard copy and in electronic form. The outside of the envelope must clearly indicate the name of the project, the time and dates specified for receipt and the name and address of the Proposer. Downloaded RFP's

The RFP and Appendix are available for download from the School District's web site at <http://www.maywood89.org/technology.asp>. Proposers who download the RFP waive their right to have clarifications and/or addenda sent to them. Such Proposers are responsible for checking the web site for clarifications and/or addenda. Failure to obtain clarifications and/or addenda from the web site shall not relieve such Proposers from being bound by additional terms and conditions in the clarifications and/or addenda, if any, or from considering additional information contained therein in preparing their proposals. Note that there may be multiple clarifications and/or addenda. Any harm to a Proposer resulting from such failure shall not be valid grounds for a protest against award(s) made under this RFP. Proposals will not be accepted in electronic form only.

Proposal Opening

Proposal opening will be on December 9th, 2011, AT 2:00 PM at the School District No. 6 Administrative offices. Proposals received prior to the time of opening will be kept secure and unopened. A proposal received thereafter will not be considered and will be returned to the Proposer unopened.

- a. Proposer shall include a breakout of E-Rate eligible and ineligible equipment and materials that include the make, model, estimated quantity and description based on the assumption. Any related costs for site survey, testing, configuration travel time and documentation should be included.
- b. Unit prices should be based on the contract terms defined herein. All contract prices shall be held firm during the contract period or E-rate funding cycle. Unit prices should be fully loaded, and include all costs associated with overhead and other miscellaneous expenses and travel.

PRICING ASSUMPTIONS FOR ALL MODULES 1 - B

- i. The Proposer will submit a proposal for each of the proposed MODULES as identified in each of the proposed sections. A sample of the cost proposal template can be found in Attachment F.
- ii. Proposer must separate all eligible and ineligible costs as they are delineated under E-Rate regulations. Proposers are recommended to consult the SLD Website for eligibility lists pertinent to the relevant eligibility conditions (www.sl.universalservice.org). Any ineligible service costs, e.g. monitoring bandwidth usage, must be delineated clearly with separate line-item pricing. Proposer will provide supporting documentation detailing the methodology of determining the cost of eligible basic maintenance vs. ineligible services provided as part of this RFP. The School District will evaluate the proposal's responsiveness and cost efficacy exclusive of the ineligible features. The following is an excerpt from the SLD Eligible Services List located at http://www.sl.universalservice.org/data/pdf/EligibleServicesList_102704.pdf which defines eligibility of basic maintenance:
 - Basic maintenance services are "necessary" if, but for the maintenance at issue, the connection would not function and serve its intended purpose with the degree of reliability ordinarily provided in the marketplace to entities receiving such services without E-Rate discounts. Basic maintenance services do not include services that maintain equipment that is not supported or that enhance the utility of equipment beyond the transport of information, or diagnostic services in excess of those necessary to maintain the equipment's ability to transport information.
 - Basic maintenance is eligible for discount only if it is a component of a maintenance agreement or contract for eligible services or products, and these maintenance services are cost effective. The agreement or contract must specifically identify the eligible products or services covered, including product name, model number, and location. The following products and services are generally eligible: repair and upkeep of eligible hardware, wire and cable maintenance, basic technical support and configuration changes. The following products and services are ineligible: on-site technical support (i.e., contractor duty station at the applicant site, when off-site

technical support can provide basic maintenance on an as-needed basis), 24-hour network monitoring, network management, help desks (that provide a comprehensive level of support beyond basic maintenance of only eligible components), and technical support contracts that are more than basic maintenance.

- iii. The School District may place additional equipment of the type specified, or industry recognized equivalents, under contract at the unit prices. If equipment is added in the middle of the year, the unit cost will be prorated for the fraction of the year that the equipment is under management
- iv. Unit prices should be based on the length on the contract period. Unit prices should be fully loaded, associated equipment costs, overhead, and other miscellaneous expenses and travel. The Board will not pay separate expenses and travel. The LAN/WAN device is covered as a single unit cost; any modular or blade component additions to the device will be covered at no additional cost. Proposer must break out the monitoring verses the maintenance cost as identified in the Cost Proposal format. Proposer must download the cost proposal format and submit their response in the given format.
- v. Prices must be firm through the end of the first Contract term. Prices for new technology must be firm through the end of the Contract term in which they are introduced. Thereafter, unit prices may be adjusted at each renewal option. Individual unit prices may be adjusted by different percentages. However, the aggregate unit price (unit prices, weighted by the number of installed units) adjustment should not exceed a certain percentage. Proposers are requested to provide a not to exceed percentage. Unused adjustments will not carry over to the next Contract year.
- vi. If the percentage of the device is only partially E-rate eligible, then the basic maintenance, installation and all associated task associated with this device assume the eligibility percentage of that device. For example, if a server is only 90% eligible, then the labor, installation and maintenance associated with this device is assumed to be 90% eligible. The Proposer must breakout out this costs based on the scope and configuration herein.
