

Lexia Reading Core5®: Sight Words Flashcards

Sight word flashcards can be used to give students repeated exposure to and practice with high-frequency sight words, many of which do not follow phonic rules. Students often struggle to automatically recognize these words and read them accurately. Being able to read high-frequency words automatically is integral to students becoming fluent readers.

These flashcards can be used in a various ways in the classroom and can supplement the activities presented in the Lexia Lessons and Lexia Connections.
