RI.2.2- Reading Informational Text

I can - Identify the main topic of a multi-paragraph as well as the focus of specific paragraphs within the text.

There are a lot of fun facts about watermelons. Do you like to eat watermelon? Did you know there are different colors of watermelons? What is the right way to pick the best watermelon?

There are many different kinds of watermelons. Watermelons come in red, yellow, white, and orange colors for you to eat. They come in seedless, which means it is without seeds. They also come seeded, which means they have a lot of seeds. Some are grown in the U.S. and Mexico, but China grows more watermelons than any other place in the world.

There are three steps in picking the best watermelon. First, look for a hard melon that is free of cuts or dents. Second, pick up the melon to make sure it is heavy. Since, watermelon is mainly water the heavier the better. Third and last step is to turn the watermelon over. There should be a yellow spot on the bottom of the melon from where it sat on the ground to get ripe and ready to eat. If there is no yellow spot, you cannot be sure if your melon is ripe enough.

HUMMINGBIRDS

Have you ever seen the tiny bird that never stops flying? Do you know its name? Have you seen how its wings flap so fast? Have you heard a bird humming?

It is called a hummingbird. It is one of the smallest birds. It is shorter than a pack of gum. Its long bill helps it drink the juice out of flowers. The juice is called nectar.

Hummingbirds have tongues to catch insects. Their tongues are sticky. Flying makes them very hungry. That is why they are always looking for flowers. They are always drinking nectar.

They live in forests, deserts, parks, and in the mountains. They live in fields and in valleys. Hummingbirds build nests for their babies anywhere they can find a quiet spot. They hunt for bugs and juice. The mother brings the food back to feed the babies.

If you see a bird that is flying quickly and is very tiny, it might be a hummingbird! Keep watching!

STORY QUESTIONS

1. A **synonym** is a word that means the same thing. *Quickly* means . . .
 - a. hunt.
 - b. slow.
 - c. fast.
 - d. quiet.
2. Where do hummingbirds live?
 - a. forests, deserts, and parks
 - b. lakes and rivers
 - c. oceans
 - d. in tall trees
3. What is the name for the juice in the flower?

a. juice	c. sticky
b. nectar	d. hungry

OSTRICH

Did you know that the ostrich is the biggest bird in the world? Did you know it has feathers? Did you know it can't fly? It cannot fly, but it can run fast—very fast. It uses its wings to flap up and down and keep it cool.

It is easy to tell if ostriches are boys or girls. Girls have brown and gray feathers. Boys have black feathers. They also have white feathers.

A male ostrich has one “main hen.” He digs a nest for her, and she lays the eggs in it. They both take turns sitting on the eggs to keep them warm. He also has other hens, but only has a nest with one.

When the eggs are six weeks old, they hatch, and baby chicks are born. These babies have spotted necks, and their bodies are brown and gray. They look like fluffy fur balls. Their necks are long and so are their legs. The first day they can walk and get their own food.

By the time they are one year old, they are as tall as their parents and are having families of their own.

STORY QUESTIONS

1. What is the biggest bird in the world?
 - a. ostrich
 - b. robin
 - c. bluebird
 - d. parrot
2. Which sentence is **NOT TRUE**?
 - a. When it is one year old, an ostrich is as tall as its mom and dad.
 - b. Ostrich babies look like fur balls.
 - c. Ostrich eggs hatch when they are ten weeks old.
 - d. Ostrich babies have spotted necks.
3. Tell what kind of sentence this is: Did you know it can't fly?
 - a. declarative
 - b. interrogative
 - c. exclamatory
